# GUIDE TO VENEERS AT BRISBANE SMILES

Smile with Confidence!

Thank you for enquiring about Veneers at Brisbane Smiles. We have sent you this information to give you a headstart in understanding Veneers prior to seeing us for a Consultation.

Veneers are a proven Cosmetic Dental Treatment. Brisbane Smiles has been creating Smiles of Brisbane for over 30 years and providing Dentistry for over 72 years. Our Dentists are highly experienced and we have the latest treatments and technologies in Cosmetic Dentistry.

## VENEERS CAN IMPROVE:

- Discoloured and Stained teeth
- Uneven, Chipped and Poorly shaped teeth
- Gappy and spaced teeth
- Mild Crowding and Crooked teeth

Porcelain Veneers are a thin custom-made porcelain tooth surface bonded onto your teeth to create a beautiful, yet natural new smile. Porcelain Veneers have many different designs and can be made by different materials. Porcelain Veneers require the technical process that our team is experienced in.

Brisbane Smiles has the most personalised process for Veneer design utilising a 4-step approach. We can have your new smile complete in just 3 weeks.

**Before Cosmetic Dentistry**

**After Cosmetic Dentistry**

**Treatment: One Dental Implant, Porcelain Veneers and Crowns.**

- Experienced team with over 70 years of combined experience
- On-site Dental Laboratory
- Private, Convenient Car-parking
- Entertainment System with over 100 Movies to enjoy
- Sedation (Sleep Dentistry) Available

# THE *Four Step* DESIGN APPROACH

## *Step One*

### CONSULTATION AND SMILE SIMULATION

The first step is a consultation. At this consultation professional photos are taken. We design a new smile and present you with your smile simulation. We discuss your smile concerns, how you want to improve your smile and design your smile around this input. You will come away from this appointment understanding your future smile possibilities with Brisbane Smiles! Cost \$100.

## *Step Two*

### SMILE PREVIEW

Once you are happy with your digital smile simulation the next step is to see this new smile design in your mouth, as it would appear once your final veneers are inserted! This allows you to visualise your new smile, understand how we can change your smile and give us feedback on the design – all this before you have even said yes to treatment! Be completely informed with how we can improve your smile before you accept treatment!

## *Step Three*

### TRIAL VENEERS

Once you are happy to proceed with Veneers then this is the stage we prep and insert Trial Veneers. Test drive your Veneers – if you have changes to colour, shape, length, curve we can make adjustments until you are completely happy. Once you are happy, our dental technicians start your Porcelain Veneers.

## *Step Four*

### FINAL VENEERS

Once you have given us sign off to start your Veneers – we insert your final Veneers – usually about 2 weeks after your Trial Veneers. You will walk away from this appointment with a beautiful, NEW smile that you will LOVE!

# TYPES OF VENEERS

When considering Veneers there are a few different options to consider.

## LAYERED PORCELAIN VENEERS

The most common, yet more expensive option are Layered Porcelain Veneers. These Veneers are the more natural looking veneers because of the layered technique used when making them to bring colour and translucency into the veneer. They are best to be used when matching your Veneers to the surrounding teeth after teeth whitening, however they can be made to be bold white. Their final presentation will be of a more natural tooth like appearance. They last many years and when well looked after can last for 20 years or more before needing to be replaced. Resin/Composite Veneers can be used in combination for the back teeth to help reduce costs.

## BOLD WHITE VENEERS

These Veneers are a popular option at the moment – their bold white presentation makes them stand out and whiten any smile! The more veneers when choosing this option the better, as they will create a big, bold white smile. These style of Veneers are made using a block veneer material and are computer milled in wax then pressed in Emax Porcelain. Their appearance is more of a solid white colour and not as translucent and teeth like as the Layered Porcelain Veneer option, however they will create a beautiful end result for your smile. These Veneers can last as long as the Layered Porcelain Veneer when well looked after. This option for Porcelain Veneers is less cost than Layered Porcelain Veneers. Resin/Composite Veneers can be used in combination for the back teeth to help reduce costs.

## RESIN/COMPOSITE VENEERS

Digitally designed Composite Veneers are the cheapest and quickest way to improve your smile. This style of Veneer is less costly and less involved than their Porcelain cousin, yet they don't last the life-span of a Porcelain Veneer. They will need to be replaced each 3-7 years.

# Treatment Packages

Brisbane Smiles offers treatment packages on all the different types of Veneers. Regardless of your treatment it is our priority to provide high quality treatments with premium aesthetic outcomes.

*Step 1:* Consultation and Smile Simulation \$100

*Step 2:* Detailed Treatment Plan and Smile Preview

Veneer Packages are available for treatments of Six or More Porcelain Veneer/Crown/Restorations. Each Package is bespoke and custom to the individual. Packages need to be approved during a Consultation Appointment to provide best pricing .

## **Porcelain Veneers range from \$1,800 to \$2,200 per tooth, including...**

The range will depend on the package and treatment complexity. Pricing includes the Veneer Preparation, Shade-matching with certified Dental Technician, Trial Veneer, Shade-check, Insertion Appointment and Review Appointment. Individualised Price estimates can be provided at Consultation Appointments.

## **Composite Veneers range from \$500 to \$800 per tooth**

The range will depend on the treatment type. Price estimates can be provided at Consultation Appointments.

## **Payment Plans are available and discussed at Consults.**

Packages stated above may not be suitable for each individual patient and are offered at the discretion of the treating Dentist.

# Case Studies

SMILES OF BRISBANE

Mild Teeth Crowding was corrected with Six Emax™ Porcelain Veneers

Mild Teeth Crowding with worn teeth was corrected with Eight Emax™ Porcelain Veneers.

Dis-proportionate Teeth Shapes with uneven and small presentation was corrected with Six Emax™ Porcelain Veneers.

Mild Teeth Discolouration was corrected with Six Emax™ Porcelain Veneers. The Lower Teeth were whitened with Zoom™ Teeth Whitening

# VENEERS - WHAT ELSE YOU NEED TO KNOW

## NON-REVERSIBLE

Porcelain Veneers are a permanent treatment and cannot be reversed. Porcelain Veneers are not a suitable option for everyone and you must seek the professional opinion from a qualified healthcare professional before proceeding. Some resin veneers and particularly bonding can be removed and teeth returned to the way they were prior, however this is not always the case.

## DRILLING

Veneers will require drilling of your teeth to allow sufficient thickness of the veneers. This ensures not just strength but also even colour and aesthetic result.

## REPLACEMENT

Veneers do not last forever and will need replacement. The precision of the Veneers, the material of resin/porcelain veneer used and your age will all have an effect on the duration veneers will last for you. Generally, Resin Veneers will last 3-8 years and Porcelain Veneers many more years than this.

## DECIDING ON VENEERS

You will find vast amounts of information and photos of veneers on the internet. There is no substitute to sitting down with a qualified Dentist and going through a full assessment and discussion prior to making a decision on proceeding with veneers. Different people will need different treatments and everyone will have different outcomes from each other.

## LOOKING AFTER VENEERS

Your Veneers need to be cared for just like your other teeth.

- Twice daily brushing and flossing
- Visiting the Dentist for a Checkup every six months
- Visiting the Dentist for cleaning every six months
- Wearing a night-time guard as recommended
- Avoiding trauma and excessive force to your teeth and veneers
- Maintaining Teeth Whitening of natural teeth

## SINGLE PORCELAIN VENEER CASE

1. Before Single Porcelain Veneer
2. Tooth is prepared for Porcelain Veneer
3. Porcelain Veneer
4. After Porcelain Veneer is inserted
